

DMX RS 485 Cable

Product Code ACC.CAB.DMX.485

Reducing interference is very important when transferring signal as part of a DMX colour changing installation. Use this cable to join the DMX decoder to DMX controllers. This will help reduce interference, quicken installation and eliminate signal issues.

Choose from either 100m reels or by the metre depending on installation.

Features & Benefits

- Shielded cable
- Interference-free DMX signals (suitable for DMX2102)
- Supplied on 100m reels (also available by the metre)

Installation Information

Weight: 49.5G

Construction Material: Copper cable
