

Series 162 Plug & Socket 2 Pole LV Terminal Blocks

Product Code ACC.162PS.008

FEATURES

Series 162STS incorporate a plug and socket integrated into one connector. These can be inter-connected to each other by simply rotating 180°. Due to their height of 8mm, they are particularly suitable for use in confined areas and are mechanically coded to prevent incorrect connection. Available in colours black or white.

Series 162ALC cord sets comprise of a 162 connector wired to a free end cable, complete with ferrules for connecting to transformers etc.

Series 162VLC extension leads are fitted with a 162 connector on each end. Please refer to order box for standard cable lengths available.

All items shown comply to low voltage regs. 73/23/EWG.

TECHNICAL DETAILS

Moulding: Nylon 6.6 (PA6/6), UL94 V0

Inserts: Brass, silver plated

Screws: M3 steel, zinc plated, chromed

Screw tightening torque: Max: 0.3 Nm

Temp. Limits: Max short term: 160°C
Continuous: 100°C

Current rating: 25A

Voltage rating: 48~

Conductor size: 0.5mm² - 2.5mm² : solid or ferruled

Wire stripping length: 7mm

Protection class: IP20

Cable: Double insulated: LSOH

OPTIONS

Cables: other cable lengths available on request
